

2006 LINCOLN LS.  
SOMEWHERE BEYOND MERE TRANSPORTATION.

Lincoln LS is an overachiever in terms of both mechanical excellence and aesthetic appeal. With a 280-hp V-8 engine, a precisely tuned, Formula One-inspired suspension and a finely crafted passenger cabin, this is an automobile for those who aspire to something that surpasses the ordinary by a wide margin.

STEP UP.

## THE LUXURY OF CHOICE.

Because personal taste is a personal matter, Lincoln LS is available with two different interior stylings. The standard interior features aluminum panels and complementary upholstery colors for a contemporary look. Choose the available Premium Package, and your LS passenger cabin will be finished with American walnut burl wood. Both interiors feature satin-nickel and leather trim.

A PERFECT FIT.

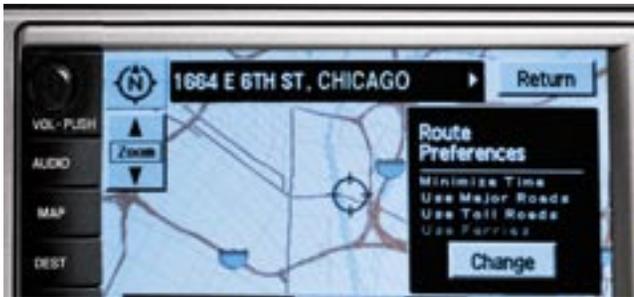

## IN TOUCH WITH THE ROAD.

The Lincoln LS is a precise driving tool. Built with near-perfect weight distribution and a sport-tuned fully independent suspension, it slices a corner with precision. The available AdvanceTrac® electronic stability enhancement system helps it maintain the chosen line even when the going is slippery,\* while a 280-hp, 32-valve, 3.9-liter V-8 helps ensure that it does it all without wasting your precious time.

\*Remember that even advanced technology cannot overcome the laws of physics. It's always possible to lose control of a vehicle due to inappropriate driver input for the conditions.

## IN TOUCH WITH YOU.

Standard equipment includes a **DUAL-ZONE ELECTRONIC AUTOMATIC TEMPERATURE CONTROL** system that allows the driver and front passenger to individually control cabin temperature. Lincoln LS's available **HEATED AND COOLED DRIVER AND FRONT-PASSENGER SEATS** are included in the Premium Package. Heated rear seats are also available. An available easy-to-use **NAVIGATION SYSTEM** provides turn-by-turn guidance. Touch a button and the system becomes a **THX™ CERTIFIED AUDIO SYSTEM** with ten speakers, including two subwoofers, and a six-disc in-dash CD changer. The **FIVE-SPEED SELECTSHIFT AUTOMATIC®** allows manual gear changes when the shift lever is positioned in the right gate. With the shift lever in the left gate, it functions as a conventional automatic transmission.

## TEST DRIVE THE 2006 LINCOLN LS.

Visit [Shopping Tools](#) at [lincoln.com](#) to locate your nearest Dealer and schedule a test drive. Or, if you prefer, you can call 800-688-8898.
